1  Vocabulary in Context

If you were asked to define the words *ambivalent*, *adverse*, and *incessant*, you might have some difficulty. On the other hand, if you saw these words in sentences, chances are you could come up with fairly accurate definitions. For example, see if you can define the words in *italics* in the three sentences below. Then, using a capital letter, write the letter of your choice on the answer line.

Do not use a dictionary for this work. Instead, in each sentence, try the word you think is the answer. For example, put *mixed* or *critical* or *approving* into the sentence in place of *ambivalent* to see which one makes the best sense.

---

___ Many of us have *ambivalent* (əm-ˈbɪv-ə-lənt) feelings about our politicians, admiring but also distrusting them.

*Ambivalent* means
A. mixed. B. critical. C. approving.

___ The *adverse* (əd-ˈvərs) effects of this drug, including dizziness, nausea, and headaches, have caused it to be withdrawn from the market.

*Adverse* means
A. artificial. B. energetic. C. harmful.

___ I prefer the occasional disturbance of ear-splitting thunder to the *incessant* (in-ˈsēs-ənt) dripping of our kitchen sink.

*Incessant* means
A. harmless. B. exciting. C. nonstop.

In each sentence above, the context—the words surrounding the unfamiliar word—provides clues to the word’s meaning. You may have guessed from the context that *ambivalent* means “mixed,” that *adverse* means “harmful,” and that *incessant* is “nonstop.”
Using context clues to understand the meaning of unfamiliar words will help you in several ways:

- It will save you time when reading. You will not have to stop to look up words in the dictionary. (Of course, you won’t always be able to understand a word from its context, so you should always have a dictionary nearby as you read.)

- After you figure out the meaning of the same word more than once through its context, it may become a part of your working vocabulary. You will therefore add to your vocabulary simply by reading thoughtfully.

- You will get a good sense of how a word is actually used, including any shades of meaning it might have.

## Types of Context Clues

There are four common types of context clues:

1. Examples
2. Synonyms
3. Antonyms
4. General Sense of the Sentence or Passage

In the following sections, you will read about and practice using each type. The practices will sharpen your skills in recognizing and using context clues. They will also help you add new words to your vocabulary.

Remember not to use a dictionary for these practices. Their purpose is to help you develop the skill of figuring out what words mean without using a dictionary. Pronunciations are provided in parentheses for the words, and a brief guide to pronunciation is on pages 595–596.

### 1 Examples

Examples may suggest the meaning of an unknown word. To understand how this type of clue works, look again at the sentence on page 21: “The *adverse* effects of this drug, including dizziness, nausea, and headaches, have caused it to be withdrawn from the market.” The examples—dizziness, nausea, and headaches—helped you figure out that the word *adverse* means “harmful.”

Look also at the cartoon on the next page. What do you think the word *initiative* (i-nish’-ə-tiv’) means?

A. anger  
B. willpower  
C. ability to take charge
Note that the example of the wife’s using initiative—going out and selling her husband’s car—helps you understand that *initiative* means “ability to take charge.”

---

**Check Your Understanding**

Now read the items that follow. An *italicized* word in each sentence is followed by examples that serve as context clues for that word. These examples, which are *boldfaced*, will help you figure out the meaning of each word. On each line, write the letter of the answer you think is correct. Then read the explanation that follows.

Note that examples are often introduced with signal words and phrases like *for example, for instance, including, and such as*.

_____ 1. *Nocturnal* creatures, such as *bats and owls*, have highly developed senses that enable them to function in the dark.

*Nocturnal* (nōk-tûr’nal) means

A. feathery.  
B. living.  
C. active at night.
PRACTICE 1: Examples

For each item below, underline the examples that suggest the meaning of the italicized term. Then write the letter of the meaning of that term on the answer line. Note that the last five sentences have been taken from college textbooks.

1. Today I had to deal with one mishap after another. I couldn’t find my car keys, I dropped a bowl of soup at lunchtime, and my computer crashed twice.

   Mishap (mĭs’hāp’) means
   A. unlucky accident.  B. event.  C. unexpected question.

   Hint: For this and all the exercises in this chapter, actually insert into the sentence the word you think is the answer. For example, substitute unlucky accident or event or unexpected question in the sentence in place of mishap to see which one fits.

2. Some mentally ill people have bizarre ideas. For instance, they may think the TV is talking to them or that others can steal their thoughts.

   Bizarre (bĭ-zär’) means
   A. limited.  B. ordinary.  C. odd.

Explaination

In each sentence, the examples probably helped you to figure out the meanings of the words in italics:

- In sentence 1, the examples given of nocturnal creatures—bats and owls—may have helped you to guess that nocturnal creatures are those that are “active at night,” since bats and owls do come out at night.
- In sentence 2, the activities referred to are clues to the meaning of mundane, which is “ordinary.”
- In sentence 3, as the examples indicate, euphemisms means “substitutes for offensive terms.”
3. Some animals have remarkable *longevity*. For example, the giant land tortoise can live several hundred years.

*Longevity* (lōn-*jēvْ-*ı-tē) means
A. appearances.  B. length of life.  C. habits.

4. Before the invention of television, people spent more time on *diversions* such as going to town concerts and ball games, visiting neighborhood friends, and playing board games.

*Diversions* (dī-*vurrْ-*zhənz) means
A. amusements.  B. differences.  C. chores.

5. Since my grandfather retired, he has developed several new *avocations*. For instance, he now enjoys gardening and chat groups on the Internet.

*Avocations* (āvْ-*ō-kāshənz) means
A. hobbies.  B. vacations.  C. jobs.

6. Children who move to a foreign country *adapt* much more easily than their parents, soon picking up the language and customs of their new home.

*Adapt* (ə-*dāptْ*) means
A. adjust.  B. struggle.  C. become bored.

7. The Chinese government provides *incentives* for married couples to have only one child. For example, couples with one child get financial help and free medical care.

*Incentives* (īn-*sēnْ-*tīvz) means
A. warnings.  B. penalties.  C. encouragements.

8. Changes in such abilities as learning, reasoning, thinking, and language are aspects of *cognitive* development.

*Cognitive* (kōgْ-*nī-tīv) means
A. physical.  B. mental.  C. spiritual.

9. Today was a day of *turmoil* at work. The phones were constantly ringing, people were running back and forth, and several offices were being painted.

*Turmoil* (tūrْ-*moilْ*) means
A. discussion.  B. confusion.  C. harmony.

10. *White-collar crime*—for example, accepting a bribe from a customer or stealing from an employer—is more costly than “common” crime.

*White-collar crime* (hwīt-kōlْ-ər krīm) means crime committed by
A. gang members.  B. strangers.  C. people in the workplace.
2 Synonyms

A context clue is often available in the form of a synonym: a word that means the same or almost the same as the unknown word. A synonym may appear anywhere in a passage to provide the same meaning as the unknown word.

Look at the cartoon below.

Notice that the synonym that helps you understand the word *terminate* is “end.”

**Check Your Understanding**

In each of the following items, the word to be defined is italicized. Underline the synonym for the italicized word in each sentence.

1. Fresh garlic may not *enhance* (ěn-hāns’) the breath, but it certainly does improve spaghetti sauce.

2. As soon as I made a *flippant* (flīp’ənt) remark to my boss, I regretted sounding so disrespectful.

3. Although the salesperson tried to *assuage* (ə-swāj’) the angry customer, there was no way to soothe her.

**Explanation**

In each sentence, the synonym given should have helped you understand the meaning of the word in italics:

- *Enhance* means “improve.”
- *Flippant* means “disrespectful.”
- *Assuage* means “soothe.”
PRACTICE 2: Synonyms

Each item below includes a word that is a synonym of the italicized word. Write the synonym of the italicized word in the space provided. Note that the last five sentences have been taken from college textbooks.

   **Hint:** How does Alan react when he has to speak in public?

2. Because my friends had advised me to *scrutinize* (skrōˈtən-əz) the lease, I took time to examine all the fine print.

3. The presidential candidate vowed to discuss *pragmatic* (präg-ˈmāt-ik) solutions. He said the American people want practical answers, not empty theory.

4. I asked the instructor to explain a confusing passage in the textbook. She said, “I wish I could, but it’s *obscure* (əb-skyōrˈ) to me, too.”

5. Teachers may overlook it when a student is two minutes late. But they are not going to *condone* (kən-dōnˈ) someone’s walking into class a half hour late.

6. When people are broke, they find that many things which seem *indispensable* (īnˈdĭ-spĭnˈsə-bəl) are not so necessary after all.

7. Managers should beware of having *adversaries* (ədˈvər-sərˈēz) work together; opponents often do not cooperate well.

8. In the same way that the arrival of mechanical equipment meant fewer farm jobs, the *advent* (ədˈvənt) of the computer has led to fewer manufacturing jobs.

9. Many corporations like to be seen as *benevolent* (bə-nēˈvəl-ənt) and will actively seek publicity for their charitable donations.

10. Throughout history, the *prevalent* (prēvˈə-lənt) authority pattern in families has been patriarchy, in which males are in control. In only a few societies has matriarchy been the customary authority pattern.
3 Antonyms

An **antonym**—a word that means the opposite of another word—is also a useful context clue. Antonyms are often signaled by words and phrases such as *however, but, yet, on the other hand,* and *in contrast.*

Look again at the sentence on page 21: “I prefer the occasional disturbance of ear-splitting thunder to the *incessant* dripping of our kitchen sink.” Here the word *occasional* is an antonym that helps us realize that the word *incessant* means “nonstop.”

Look also at the cartoon below.

Note that the antonym *lowers* help you figure out that *amplifies* must mean “increases.”

---

**Check Your Understanding**

In each sentence below, underline the word that means the opposite of the italicized word. Then, on the answer line, write the letter of the meaning of the italicized word.

1. Many people have pointed out the harmful effects that a working mother may have on the family, yet there are many *salutary* effects as well.

   *Salutary* (săl‘yə-tər‘ē) means
   A. well-known. B. beneficial. C. hurtful.
2. Trying to control everything your teens do can *impede* their growth. To advance their development, allow them to make some decisions on their own.

*Impede* (ɪm-pēd′) means
A. block.        B. predict.        C. improve.

3. During their training, police officers must respond to *simulated* emergencies in preparation for dealing with real ones.

*Simulated* (sɪm′yə-lā′tɪd) means
A. made-up.        B. mild.        C. actual.

**Explanation**
In the first sentence, salutary effects are the opposite of “harmful effects,” so *salutary* means “beneficial.” In the second sentence, *impede* is the opposite of “advance,” so *impede* means “block.” Last, the opposite of “real” is “simulated”; *simulated* means “made-up.”

**PRACTICE 3: Antonyms**

Each item below includes a word that is an antonym of the italicized word. Underline the antonym of each italicized word. Then, on the answer line, write the letter of the meaning of the italicized word. Note that the last five sentences have been taken from college textbooks.

1. Many politicians do not give *succinct* answers. They prefer long ones that help them avoid the point.

   **Hint:** If politicians prefer to give long answers, what kind of answer do they usually not give?

   *Succinct* (sək-sǐŋkt′) means
A. brief.        B. accurate.        C. complete.

2. Although investments in the stock market can be *lucrative*, they can also result in great financial loss.

   *Lucrative* (lʊo′krə-tɪv) means
A. required.        B. financially rewarding.        C. risky.

3. “I’ve seen students *surreptitiously* check answer sheets during exams,” said the professor. “However, until today I never saw one openly lay out a cheat sheet on his desk.”

   *Surreptitiously* (sʊr′əp-tɪsh′əs-lē) means
A. legally.        B. secretly.        C. loudly.
4. While Melba’s apartment is decorated plainly, her clothing is very flamboyant.

*Flamboyant* (flăm-boi’ānt) means
A. inexpensive. B. flashy. C. washable.

5. To keep healthy, older people need to stay active. Remaining *stagnant* results in loss of strength and health.

*Stagnant* (stāg’nənt) means
A. inactive. B. lively. C. unhealthy.

6. In formal communication, be sure to avoid *ambiguous* language. Clear language prevents confusion.

*Ambiguous* (ām-bīg’yōō-as) means
A. wordy. B. ineffective. C. unclear.

7. Being raised with conflicting values can be a *detriment* to boys’ and girls’ relationships with each other. In contrast, shared values can be a benefit.

*Detriment* (dē’trō-mənt) means
A. improvement. B. drawback. C. relationship.

8. While houses and antiques often increase in value, most things, such as cars and TVs, *depreciate*.

*Depreciate* (dē-prē’shē-āt’) means
A. remain useful. B. lose value. C. break.

9. Reliable scientific theories are based not upon careless work, but rather upon *meticulous* research and experimentation.

*Meticulous* (mē-tik’yə-ləs) means
A. hasty. B. expensive. C. careful.

10. In the early days of automobile manufacturing, *stringent* laws controlled motorists’ speed. In contrast, the laws designed to protect consumers from faulty products were extremely weak.

*Stringent* (strīn’jənt) means
A. informal. B. not effective. C. strict.
4 General Sense of the Sentence or Passage

Sometimes it takes a bit more detective work to puzzle out the meaning of an unfamiliar word. In such cases, you must draw conclusions based on the information given with the word. Asking yourself questions about the passage may help you make a fairly accurate guess about the meaning of the unfamiliar word.

Look at the cartoon below.

To figure out the meaning of *alleviate*, try asking this question: What would the patient want the prescription to do to his aches and pains? The patient’s words to his doctor strongly suggest that *alleviate* means “lessen.”

---

**Check Your Understanding**

Each of the sentences below is followed by a question. Think about each question; then, on the answer line, write the letter of the answer you think is the correct meaning of the italicized word.

_____ 1. A former employee, *irate* over having been fired, broke into the plant and deliberately wrecked several machines.

(What would be the employee’s state of mind?)

*Irate* (ī-rāt′) means

A. relieved. B. very angry. C. undecided.
2. Despite the **proximity** of Ron’s house to his sister’s, he rarely sees her. (What about Ron’s house would make it surprising that he didn’t see his sister more often?)

**Proximity** (prŏk-sĭm’ĭ-tē) means
A. similarity. B. nearness. C. superiority.

3. The car wash we organized to raise funds was a **fiasco**—it rained all day. (How successful would a car wash be on a rainy day?)

**Fiasco** (fē-ās’kō) means

**Explanation**
The first sentence provides enough evidence for you to guess that *irate* means “very angry.” **Proximity** in the second sentence means “nearness.” And a **fiasco** is a “complete disaster.” (You may not hit on the exact dictionary definition of a word by using context clues, but you will often be accurate enough to make good sense of what you are reading.)

### PRACTICE 4: General Sense of the Sentence or Passage

Try to answer the question that follows each item below. Then use the logic of each answer to help you write the letter of the meaning you think is correct. Note that the last five sentences have been taken from college textbooks.

1. The lizard was so **lethargic** that I wasn’t sure if it was alive or dead. It didn’t even blink. (Would an animal that seemed dead be green, inactive, or big?)

**Lethargic** (lĕ-thăr’jĭk) means

2. Jamal didn’t want to tell Tina the entire plot of the movie, so he just gave her the **gist** of the story. (What kind of information would Jamal have given Tina?)

**Gist** (jĭst) means
A. ending. B. title. C. main idea.
3. After the accident, I was angered when the other driver told the police officer a complete fabrication about what happened. He claimed that I was the person at fault.

(How truthful was the other driver's information?)

Fabrication (fā'brē-kā'zhən) means

4. The public knows very little about the covert activities of CIA spies.

(What kind of activities would the CIA spies be involved in that the public wouldn't know much about?)

Covert (kōv'ərt or kō-vûrt') means
A. public. B. secret. C. family.

5. Whether or not there is life in outer space is an enigma. We may never know for sure until we are capable of space travel or aliens actually land on our planet.

(What would we call something to which we have no answer?)

Enigma (i-nīg'mə) means
A. reason. B. certainty. C. mystery.

6. Suicide rates tend to fluctuate with the seasons, with much higher rates in the winter than in the summer.

(What happens to the suicide rate from season to season?)

Fluctuate (flŭk'chō-ā't) means
A. go up and down. B. disappear. C. stay the same.

7. Human beings are resilient creatures—they can often bounce back from negative experiences and adjust well to life.

(What point is the author making about the nature of human beings?)

Resilient (rē-zīl'yənt) means
A. not flexible. B. living. C. able to recover.

8. A major accomplishment of sociology is dispelling the myths and prejudices that groups of people have about each other.

(What would a profession do to "myths and prejudices" that could be considered a "major accomplishment"?)

Dispelling (dī-spěl'īng) means
A. ignoring. B. making vanish. C. creating again.
9. Ten years of research culminated in a report explaining the mysterious behavior of the praying mantis, a large green or brownish insect. (What would be the relationship of the report to the research?)

*Culminated* (kūl′mə-nā′tīd) means
A. failed. B. began. C. concluded.

10. Despite complaints from parents, educators, and government officials, violence and sex on television seem to go on unabated. (In spite of the complaints, does anything happen?)

*Unabated* (ūn′ə-bā′tīd) means
A. more slowly. B. unstopped. C. at great expense.

An Important Point about Textbook Definitions

You don’t always have to use context clues or the dictionary to find definitions. Very often, textbook authors define important terms. Also, after giving a definition, authors usually follow it with one or more examples to ensure that you understand the new term. For instance, here is a short textbook passage that includes a definition and an example:

1People do not always satisfy their needs directly; sometimes they use a substitute object. 2Use of a substitute is known as displacement. 3This is the process that takes place, for instance, when you control your impulse to yell at your boss and then go home and yell at the first member of your family who is unlucky enough to cross your path.

Textbook authors, then, often do more than provide context clues: they define a word, set it off in *italic* or *boldface* type, and provide examples as well. When they take the time to define and illustrate a word, you should assume that the term is important enough to learn.

More about textbook definitions and examples appears on pages 224–225 in the “Relationships II” chapter.
CHAPTER REVIEW

In this chapter, you learned the following:

- To save time when reading, you should try to figure out the meanings of unfamiliar words. You can do so by looking at their context—the words surrounding them.

- There are four kinds of context clues: examples (marked by words like for example, for instance, including, and such as); synonyms (words that mean the same as unknown words); antonyms (words that mean the opposite of unknown words); and general sense of the sentence (clues in the sentence or surrounding sentences about what words might mean).

- Textbook authors typically set off important words in italic or boldface and define those words for you, often providing examples as well.

The next chapter—Chapter 2—will introduce you to the most important of all comprehension skills, finding the main idea.

On the Web: If you are using this book in class, you can visit our website for additional practice in understanding vocabulary in context. Go to www.townsendpress.com and click on “Online Exercises.”
To review what you’ve learned in this chapter, answer the following questions by filling in the blank or writing the letter of the correct answer.

1. Often, a reader can figure out the meaning of a new word without using the dictionary—by paying attention to the word’s _________________.

2. In the sentence below, which type of context clue is used for the italicized word?
   A. example   B. synonym   C. antonym
   You can’t take certain courses unless you’ve taken a *prerequisite* (prē-rēˈkwi zit); for instance, you can’t take Spanish Literature I unless you’ve taken Spanish III.

3. In the sentence below, which type of context clue is used for the italicized word?
   A. example   B. synonym   C. antonym
   There are thick pine forests at the foot of the mountain, but higher up, the trees become *sparse* (spārs).

4. In the sentences below, which type of context clue is used for the italicized word?
   A. example   B. synonym   C. antonym
   Talent may take years to surface. When Beethoven was a young child, his great *aptitude* (āpˈtī tō̅d) in music was not at all apparent to his teachers.

5. Often when textbook authors introduce a new word, they provide you with a ________________ and follow it with ________________ that help make the meaning of the word clear.
A. Look at the cartoon below, and then answer the questions which follow.

“I’m trying to curtail my coffee drinking by cutting down to just one cup a day.”

_____ 1. Using the context clues in the cartoon, write the letter of the best meaning of *curtail* (kər-tāl’) in the space provided.
   A. improve  
   B. reduce  
   C. supplement

_____ 2. What kind of context clue helps you understand the meaning of the cartoon?
   A. Examples clue  
   B. Synonym clue  
   C. Antonym clue

B. Using context clues for help, write the letter of the best meaning for each italicized word. Use the space provided.

_____ 3. *Nepotism* (nēp’ə-tız’əm) is commonplace where I work: the boss’s daughter is vice-president of the company, her husband runs the order department, and their son has just started working in the warehouse.
   A. good managerial practice  
   B. favoritism to relatives  
   C. arguments among employees  
   D. confusion among management

_____ 4. Because the professor’s explanation was *nebulous* (nēb’yə-ləs), several of the students asked him to make himself clear.
   A. vague  
   B. boring  
   C. fascinating  
   D. brief
5. The bank robber was apparently non-descript—none of the witnesses could think of any special characteristics that might identify him.

A. poorly disguised
B. lacking distinctive qualities
C. memorable
D. cruel

C. Using context clues for help, write the definition for each italicized word. Then write the letter of the definition in the space provided. Choose from the definitions in the box below. Each definition will be used once.

<table>
<thead>
<tr>
<th>A. discouraged</th>
<th>B. doubtful</th>
<th>C. nag</th>
</tr>
</thead>
<tbody>
<tr>
<td>D. overjoyed</td>
<td>E. provided</td>
<td></td>
</tr>
</tbody>
</table>

6. I would not just be glad if I won the lottery; I’d be ecstatic.

Ecstatic (ěk-stā’tĭk) means ________________________________.

7. Nature has endowed hummingbirds with the ability to fly backward.

Endowed (ěn-doud’) means ________________________________.

8. Opponents of the death penalty say it has never actually deterred anyone from committing murder.

Deterred (dĭ-tūrd’) means ________________________________.

9. Around the age of two or three, small children like to badger their parents with endless questions beginning with the word “why.”

Badger (bāj’ər) means ________________________________.

10. While four-year-old Mattie claimed she was going to stay up until midnight on New Year’s Eve, her parents were dubious of her ability to remain awake that late.

Dubious (dōŏ’bē-əs) means ________________________________.
A. Use context clues to figure out the meaning of the italicized word in each of the following sentences, and write your definition in the space provided.

1. While it’s often not feasible to work full-time while going to school, it may be practical to hold down a part-time job.
   *Feasible* (fē’zə-bəl) means ____________________________

2. It’s amazing that my neighbors always appear *immaculate*, yet their apartment is often quite dirty.
   *Immaculate* (i-māk’yə-līt) means ____________________________.

3. It’s against the law to ask people to *divulge* their ages at job interviews.
   *Divulge* (dī-vūl’j) means ____________________________.

4. Doctors should *alleviate* the pain of terminally ill patients so that their final days are as comfortable as possible.
   *Alleviate* (ə-lē’vē-āt’) means ____________________________.

5. When rain and sunshine are *simultaneous*, the rain is often described as a sun shower.
   *Simultaneous* (sī’məl-tə’nē-əs) means ____________________________.

B. Use context clues to figure out the meanings of the italicized words in the following textbook passages. Write your definitions in the spaces provided.

1. Although mysteries and science fiction may seem like very different kinds of writing, the two forms share some basic similarities.

2. First of all, both are action-directed, emphasizing plot at the expense of character development.

3. Possibly for this reason, both types of literature have been *scorned* by critics as being merely “entertainment” rather than “literature.”

4. But this attack is unjustified, for both mysteries and science fiction share a concern with moral issues.

5. Science fiction often raises the question of whether or not scientific advances are of benefit to humanity.

6. And a mystery story rarely ends without the *culpable* person being brought to justice.

6. *Scorned* (skŏrmd) means ____________________________.

7. *Culpable* (kūl’pə-bəl) means ____________________________.
1. Why did people begin to live in cities? 2. To answer this question, we must start by looking back some ten thousand years ago. 3. In certain parts of the world (probably those where the natural food supply was fairly unreliable), people endeavored to tame nature for their own purposes. 4. They began weeding and watering groups of edible plants, adding organic matter to help fertilize the soil, and saving the seeds from the strongest, most desirable plants to sow the next spring. 5. At the same time, they began protecting herds of small wild animals that were often hunted by larger animals. 6. They would move them to more plentiful pastures during the dry months of summer. 7. During the harshest periods of winter, they would supplement whatever fresh food was available with stored food. 8. These changes, coupled with a few simple techniques for storing grain and meat, enabled people to abandon a wandering lifestyle in favor of settlement in small villages. 9. These villages were the basic form of human social organization for the next several thousand years.

10. *Coupled* (kŭp′əld) means ____________________________ .
The story began on a downtown Brooklyn street corner. An elderly man had collapsed while crossing the street, and an ambulance rushed him to Kings County Hospital. There, during his few returns to consciousness, the man repeatedly called for his son.

From a smudged, often-read letter, an emergency-room nurse learned that the son was a Marine stationed in North Carolina. Apparently, there were no other relatives.

Someone at the hospital called the Red Cross office in Brooklyn, and a request for the boy to rush to Brooklyn was relayed to the Red Cross director of the North Carolina Marine Corps camp. Because time was short—the patient was dying—the Red Cross man and an officer set out in a jeep. They located the sought-after young man wading through marshy boondocks on maneuvers. He was rushed to the airport in time to catch the one plane that might enable him to reach his dying father.

It was mid-evening when the young Marine walked into the entrance lobby of Kings County Hospital. A nurse took the tired, anxious serviceman to the bedside.

“Your son is here,” she said to the old man. She had to repeat the words several times before the patient’s eyes opened. Heavily sedated because of the pain of his heart attack, he dimly saw the young man in the Marine Corps uniform standing outside the oxygen tent. He reached out his hand. The Marine wrapped his toughened fingers around the old man’s limp ones, squeezing a message of love and encouragement. The nurse brought a chair, so the Marine could sit alongside the bed.

Nights are long in hospitals, but all through the night the young Marine sat there in the poorly lighted ward, holding the old man’s hand and offering words of hope and strength. Occasionally, the nurse suggested that the Marine move away and rest a while. He refused.

Whenever the nurse came into the ward, the Marine was there. His full attention was on the dying man, and he was oblivious of her and of the night noises of the hospital—the clanking of an oxygen tank, the laughter of night-staff members exchanging greetings, the cries and moans and snores of other
patients. Now and then she heard him say a few gentle words. The dying man said nothing, only held tightly to his son through most of the night.

Along toward dawn, the patient died. The Marine placed on the bed the lifeless hand he had been holding, and went to tell the nurse. While she did what she had to do, he relaxed—for the first time since he got to the hospital.

Finally, she returned to the nurse’s station, where he was waiting. She started to offer words of condolence for his loss, but the Marine interrupted her. “Who was that man?” he asked.

“He was your father,” she answered, startled.

“No, he wasn’t,” the Marine replied. “I never saw him before in my life.”

“Why didn’t you say something when I took you to him?” the nurse asked.

“I knew right off there’d been a mistake, but I also knew he needed his son, and his son just wasn’t here. When I realized he was too sick to tell whether or not I was his son, I figured he really needed me. So I stayed.”

With that, the Marine turned and left the hospital. Two days later a routine message came in from the North Carolina Marine Corps base informing the Brooklyn Red Cross that the real son was on his way to Brooklyn for his father’s funeral. It turned out there had been two Marines with the same name and similar serial numbers in the camp. Someone in the personnel office had pulled out the wrong record.

But the wrong Marine had become the right son at the right time. And he proved, in a uniquely human way, that there are people who care what happens to their fellow human beings.

Discussion Questions

1. When do you think the Marine realized that calling him to the hospital was a mistake? Was it when he first saw the old man or before? What parts of the reading support your conclusion?

2. How do you think the dead man’s real son felt about the other Marine being with his dying father? How would you feel?

3. The incident in the reading took place because of some surprising coincidences. What were they? Has a surprising or interesting coincidence ever taken place in your life? If so, what was it, and how did it affect you?

4. By going out of his way for a stranger, the Marine showed “in a uniquely human way that there are people who care what happens to others.” Have you ever gone out of your way to help a stranger? Or have you seen someone else do so? Tell what the situation was and what happened.

In the early days of medicine, there were few drugs or treatments that gave any real physical benefit. As a result, patients were treated in a variety of strange, largely ineffective ways. For instance, Egyptian patients were medicated with “lizard’s blood, crocodile dung, the teeth of swine, the hoof of an ass, rotten meat, and fly specks.” If the disease itself didn’t cause the patient to succumb, he or she had a good chance of dying instead from the treatment. Medical treatments of the Middle Ages were somewhat less lethal, but not much more effective. And as late as the eighteenth century, patients were subjected to bloodletting, freezing, and repeatedly induced vomiting to bring about a cure.

Amazingly, people often seemed to get relief from such treatments. Physicians have, for centuries, been objects of great respect, and this was no less true when few remedies were actually effective. To what can one attribute the fair level of success that these treatments provided and the widespread faith in the effectiveness of physicians? The most likely answer is that these are examples of the tremendous power of the placebo effect—“any medical procedure that produces an effect in a patient because of its therapeutic intent and not its specific nature, whether chemical or physical.” Even today, the role of placebos in curtailing pain and discomfort is substantial. Many patients who swallow useless substances or who undergo useless procedures find that, as a result, their symptoms disappear and their health improves.
